ALABAMA
MUNICIPAL
DATA BOOK
1985

Reproduction of this document in whole or in part by a user is permitted provided proper citation of author(s), title, publisher and date is given.

This is one of several efforts being undertaken as a part of the State Information Planning Program to provide information and assistance to the State of Alabama and its regional and local units of government.

The preparation of this report was financed in part through federal grants from the Department of Housing and Urban Development under the Urban Planning Assistance Program authorized by Section 701 of the Housing Act of 1954 and the Department of Commerce under Section 302 of the Public Works and Economic Development Act of 1965, as amended; administered by the State Planning Division, Alabama Department of Economic and Community Affairs.

Abstract:

This publication contains forty-six (46) items of economic, financial, and social data for Alabama municipalities plus five (5) maps. The bulk of the data is taken from the 1980 Census of Population & Housing; population, income, crime and financial data are from 1983 or 1984.

ACCURACY OF THE DATA

The bulk of the data presented in this publication is sample data tabulated from the 1980 U.S. Census of Population and Housing. Data such as that concerning total population, age, race and number of families is based on a complete (100%) count of persons; however, the remainder - income, poverty, education and employment data - is tabulated from samples of the population. The table in 'Source' indicates which data items are based on complete counts, which on samples and which on administrative records.

Two sampling rates were used in the 1980 Census. In places municipalities of fewer than 2,500 persons, one-half of the housing units were sampled; in places of 2,500 and over, one-sixth of the housing units were sampled. Even with a 50% sampling rate, sampling errors may be quite large, particularly when the size (population) of a place is quite small. Any decision based on sample data should be based also on the probability of sampling error. Estimates of sampling error for each place in terms of standard error and confidence bounds may be found in 'Appendix D. — Accuracy of the Data' **Summary Characteristics of Governmental Units and Standard Metropolitan statistical areas (SMSAs)**, 1980 Census of Population and Housing.

DESCRIPTION OF THE DATA

CODES - The county, census county division (CCD), and municipal codes are those developed by the U.S. Bureau of the Census. The code number for the State of Alabama is 01. The codes for the counties are three digit odd numbers assigned alphabetically, ranging in Alabama from 001 (Autauga County) to 133 (Winston County). The same system is used in each state; therefore, to identify a county completely, the county code should be preceded by the state code, e.g., 01065 is the code for Hale County, Alabama. County census division (CCD) codes are three digit numbers, usually multiples of five and are assigned alphabetically within each county. Municipal codes are four digit numbers, usually multiples of five, and are assigned alphabetically within each state. A state code plus a municipal code will identify any municipality in the U.S. e.g., 010540 is the code for Elkmont, Alabama. These codes are widely used to identify municipal and other data in machine-readable files, and are requested on some U.S. government forms.

POPULATION - The 1984 population figures are estimates developed by the U.S. Bureau of the Census, and are popularly known as the 'Revenue Sharing estimates' as they were initially developed for use in the Revenue Sharing program. The 1980 and 1970 figures are counts from the 1980 and 1970 U.S. Censuses of Population. Dots (...) in the 1970 line indicate that the municipality was incorporated after 1970.

PER CAPITA INCOME - These are the only estimates of personal income available for all municipalities since the 1980 Census. The figure 'Mun./State: 1979' gives the ratio of the municipal per capita income to the statewide per capita of \$5,894 in 1979.

FAMILY INCOME - 'Median Family Income' is that income which is at the mid-point of the income range for the area, i.e., A median family income of \$15,000 for the Town of Ajax means that half (50%) of the families in Ajax had an income less than \$15,000 and half had an income

more than \$15,000. The percent of families in the income ranges 'less than \$5,000' and 'more than \$50,000' has been included to indicate the concentrations of incomes at the upper and lower ends of the range.

PERSONS WITH INCOME LESS THAN POVERTY: 1979 - Persons with income less than the poverty level are shown by number and as a percent of all persons as well as the number of persons in older and younger age groups. The poverty level income varies by size of family and age of head of household. The poverty thresholds for 1979 are available in Appendix B of **Summary Characteristics of Governmental Units**, U.S. Bureau of the Census.

HIGH SCHOOL GRADUATES - This is the percent of the population 25 years old and over with a high school education or better, i.e., those persons who have completed 12 or more grades. The median grade completed was not included because it was not calculated for municipalities less than 2,500 population.

EMPLOYMENT: 1980 - Employment is shown both as a total, the number of persons working, and as a percent of the total population. A low percent of employment relative to the State usually indicates a large percent of the total population in '0-18' and '65 & over' age groups and/or a lack of job opportunities in the area. Percent employed in manufacturing (Mnfg) and in trade (wholesale and retail combined) is included to give an idea of the economy of the municipality.

FINANCE: FY83 - These figures are those reported by each municipality on Form RS-9 of the Revenue Sharing Program. 'Total Taxes' include all reported tax collections minus any monies which subsequently are passed on to school districts. 'Property' and 'Sales' tax figures are included to indicate the sources of the municipalities' revenue along with 'Revenue Sharing' money. 'Total Taxes' do not represent the total revenue of a municipality as most receive some monies from other local sources, state sources, and other federal sources. 'NR' appears in this line if the municipality did not report.

CRIME: 1984 - These figures are those reported by municipal police departments to the Alabama Criminal Justice Information Center. 'NR' appears in this line if the municipality did not report. Crimes included are murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny of \$50.00 or more, and auto theft.

HOUSING: 1980 - The term 'All Units' refers to year-round housing units and includes units occupied by owner or renter, vacant units for rent or sale but excludes seasonal units - either vacation or held for migratory workers. 'Occupied Units' are those in which persons were living or only temporarily absent from at the time of census enumeration. 'Owner Occupied' (%) indicates those units occupied by the owner of the unit, the balance being occupied by renters. 'Without (w/o) All Plumbing' indicates units lacking one or more of the following: hot piped water, flush toilet, or bathtub or shower. 'Value' is the respondent's estimate of how much the property (house and lot) would sell for if it were for sale. These figures apply only to owner occupied units. The category 'Built before 1939' is included to give an indication of the age of the housing stock and refers to all year-round units. 'Public Water/Sewer' indicates the percent of all occupied units which are served by public water and sewer systems as opposed to private wells and septic tanks. 'With no Automobile' refers to housing units without access to any vehicle.
